

Career Opportunity Water Resources Engineer

Firm: Aqua Engineering (AQUA)
Job Location: Bountiful, Utah
Position Title: Water Resources Engineer
Requirements: 5 Years of Experience; PE Required

As a water resources engineer, you will work with other engineers, and Designers and other staff to plan, design, and oversee construction on projects including components of water resources planning, water and wastewater treatment, water transmission, sewer collection, stormwater drainage, source development, groundwater management, among others. We provide a fun, flexible and fast-paced environment with exciting project opportunities.

What We Offer

- ✓ **Excellent salary, benefits, and perks.** 401K, Medical, Life Insurance, and Profit Sharing. We offer dental, vision, and other supplemental insurance plans that you may elect to participate in.
- ✓ **Job security and growth potential.** Highly reputable 30-yr medium-sized firm. AQUA commits to investing heavily in our most important asset - our people. Together, we are stronger and more innovative.
- ✓ **Flexible work schedule and location.** Whether you're working from the AQUA office, remote location or at a client site, you will be working in an environment where your integrity and innovative mindset is supported.
- ✓ **Collaboration with and Mentorship by Firm Principals.** AQUA has a great working environment and company culture. We have a very supportive and open environment which gives you the opportunity to take your career to any level you desire.
- ✓ **Immediate responsibility and opportunity to contribute.** Innovative, exciting, and challenging projects that make a significant environmental and social impact.
- ✓ **Culture founded on open communication, respect, commitment, and teamwork.** Our core principles include integrity, excellence, creativity, and innovation. We also believe in working hard and smart while maintaining a healthy balance between our professional and personal lives.

Qualifications

- **Education:** Bachelor or Master of Science Degree in Civil Engineering
- **Experience:** 5 years of experience. Strong understanding of water resources industry and technology trends, including all aspects of water resource systems from studies through construction; firm understanding of hydraulics and hydrology. Ability to work on multiple projects simultaneously in a fast-paced environment.
 - Understanding of the Division of Drinking Water (DDW) rules and regulations
 - Understanding of the Division of Water Rights (DWRi) rules and regulations
 - Experience with project funding options through both local and federal agencies
 - Experience with client marketing efforts and proposal development
- **Interpersonal Skills:** Strong communication skills (e.g., negotiation, listening, cooperation, tact, diplomacy) to build strong relationships. Capable of working efficiently with clients, contractors, regulatory agencies, and internal staff.
- **Leadership** and project management skills (e.g., planning, organizing, controlling, and leading teams and being a team player). Ability to lead and mentor junior staff.
- **Strong written and verbal communication** skills (e.g., fluency in report writing and presentations).
- **Quantitative skills** (e.g., analytical, technical, problem solving).
- Proficiency with Microsoft Office, GIS software, and in a variety of hydraulic and hydrologic computer modeling programs.
- **Attitude:** Must have a positive, can-do attitude that embraces challenges and opportunities
- **Work Ethic:** Committed to work hard and smart as team player

About Us.
